

Albion Chairs Sellers' Guide

March 2023

made to measure made simple
off the shelf bespoke seating

Complete flexibility is the key to our collection. We offer the most comprehensive range of office seating options currently available from a UK manufacturer to suit all body sizes and office environments.

With Albion Chairs, our customers can select a made-to-measure chair at an off-the-shelf price.

An extensive collection of soft seating and visitors' chairs provides comfortable seating for the office environment away from the desk.

Albion Chairs has been delivering the complete seating solution throughout the office building since 1987.

Uni Bundles

Albion
chairs

Uni bundles

These pre-loaded task chairs epitomise workplace ergonomics made simple. All models allow adjustment of seat and back tilt, backrest height (ratchet), seat depth, arm height and lumbar support (lumbar pump). Weight limit up to **120kgs**. **24/7** warranty available for 18 months.

These heavy duty pre-loaded task chairs take workplace ergonomics to the next level. All models allow adjustment of seat and back tilt, backrest height (ratchet), seat depth, arm height and lumbar support (lumbar pump). Weight limit up to **150kgs**. **24/7** warranty available for **2 years**.

These heavy duty pre-loaded executive task chairs take workplace ergonomics to the max; made to measure made simple. All models allow adjustment of seat and back tilt, backrest height (ratchet), seat depth, arm height and lumbar support (lumbar pump). Weight limit up to **150kgs**. **24/7** warranty available for 2 years. Because the backs are made from fully upholstered plywood's, it is possible to make a made to measure back profile to suit specific requirements on top of the made to measure seat if required.

The **SPYNAMICS** range is a specialist design built for users who suffer from back pain. The **SPYNAMICS** chair has been designed in a modular fashion ensuring that each of the key areas of the spine receive optimum support. Created together with the expertise of teaching osteopath Stephen Green, we have used state-of-the-art material technologies combined with the latest in adjustable seating controls to bring the concept of **SPINAL DYNAMICS** into the workplace.

The unique feature of **SPYNAMICS** is the **TRIANGULATION of SUPPORT** provided by the pelvic module cushion and the two way and pump lumbar combo. Together with the sacral thoracic pumps, these combine to provide ergonomic comfort that surpasses all other orthopaedic chairs.

The **SPYNAMICS** range of chairs promote correct seating posture and best practice thereby aiding those with existing back complaints as well as helping others to avoid potential problems.

Seating solutions for the chronic bad back sufferer; the occupational health professional, the access to work market and the everyday back care at work chairs

Virtual Assessments

P range

Price-conscious seating

The **P range** provides a compact range of operator, task seating with price in mind. Selecting the seating is a simple case of choosing no arms or a ring or a height adjustable arm; the functionality remains the same and meets the minimum VDU requirement in the workplace.

We haven't compromised on this UK manufactured chair; we still use the FIRA tested mechanical parts and it's guaranteed for 3 years; reduced to 1 year for 24/7 use. We have made savings by reducing the options available, and by using cut foams as opposed to moulded (cold cure) foams.

If you are looking for value for money and one of our UNI Bundles or Bespoke chairs does not meet your needs, then enquire about one of the **P range**.

stools, saddles and sitstand solutions

Not everyone works at a 720mm static height desk; a lot of people work at different workstations, benches, counters etc. They don't always work at computers typing on keyboards; sometimes they are working on an assembly line, in labs with microscopes, with money, with people's eyes, teeth etc and more and more people are sitting at (electric) height adjustable desks. The saddle seat enables the hip joint of the user to be kept at an optimal angle of 135 degrees which encourages the spine "S" shape posture and puts much less stress on the vertebrae and discs in the back.

The stools and chairs shown can provide an answer to these requirements (as well as) leg rests and can be sold as seen or with different spindles, castors, glides, footrings etc to ensure the finished article best fits the needs of the user, their job and their environment (flooring etc).

For more information on the base configurations please refer to the options shown in the uni bespoke pages 6-7 or the summary on page 51.

TS1

14.5" (370mm) diameter stool

- Standard configuration with 9" spindle (other configurations available).
- Shown with black base (chrome and silver available).

COL 1	COL 2
£158.07	£165.60

TS2

Saddle stool

- Standard configuration with 9" spindle (other configurations available).
- Shown with black base (chrome and silver available).
- Forward tilting adjustable

COL 1	COL 2
£228.93	£236.46

TS3

Height adjustable mobile leg rest.

- Standard configuration with 9" gas and small base.
- Forward tilting adjustable

COL 1	COL 2
£228.93	£236.46

TS3DBL

Height adjustable mobile leg rest. Designed to support both legs at the same time if need be

- Standard configuration with 9" gas and small base.
- Forward tilting adjustable

COL 1	COL 2
£297.61	£305.14

TS4

Saddle stool with medium back.

- Promotes correct posture with optimal pelvic/spine balance.
- Standard configuration with 9" gas.
- Other configurations available.
- Works with height adjustable desk.

COL 1	COL 2
£348.48	£355.44

TS5*

Saddle stool with high operator back.

- Promotes correct posture with optimal pelvic/spine balance.
- Standard configuration with 9" gas.
- Shown with silver base and duo upholstery.
- Works well with height adjustable desk.

COL 1	COL 2
£362.89	£374.95

TS6*

Saddle stool with Tulip back

- Promotes correct posture with optimal pelvic/spine balance.
- Standard configuration with 9" gas.
- Shown with silver base and duo upholstery.
- Works well with height adjustable desk.

COL 1	COL 2
£382.36	£394.42

TS7

Perching stool

- Designed specifically with sit stand desking in mind.
- Shown with 14" gas lift and metal 5 star base and glides.
- Other configurations are available.

COL 1	COL 2
£302.33	£309.86

TS100

Height adjustable heavy duty footrest

- Height is controlled by a foot operated gas lift.
- Ideal for counter height environments.

COL 1
£383.20

* Priced in black/extra for DU and VL base

new for the 2020's

TS9

Has the forward tilting saddle seat as well as the lower back support backrest but also allows you to activate the seat height with your foot using the chrome ring integrated into the polished aluminium base. Comes with chrome finish and foot activated seat height actuator

COL 1	COL 2
£950.00	£962.05

TS10

Introduces the split seat saddle with arm/backrest that allows for swivelling to reposition the rest to be an armrest, a backrest or a chest rest if leaning forward. The seat has the added feature of wobbling in a designed way, so you are never static. Comes with chrome finish as standard

COL 1	COL 2
£890.00	£902.05

TS12

Introduces the stool that has a curved, weighted base to allow for perching from any angle or side. If you sit up at the high end of the travel more often, you might feel the need for the footring. Comes with higher gas lift and allows for wobbling forward and back in a dynamic seating style and works well with sitstand desks or where people might like to perch in their job.

Draughtsman footring add £58.70

COL 1	COL 2
£435.00	£443.00

PUI*

An ergonomic task chair for an industrial environment

The requirements for chairs used in industrial and technical environments differ from those for office chairs. Work performed in manufacturing workplaces involves the use of force, lots of standing, and recurring movements, and need to be durable, resistant to sparks and oils, easy to clean, and highly adjustable. The PUI chair is appropriate for this working environment and will support the employee in various working positions. Can be configured with draughtsman spindle and footring and different castors or glides if required.

9" Configuration £238.50
Draughtsman configuration £320.85

*PU = PolyUrethane

Visitor and soft seating

Over the next 24 pages we will present our offering of visitor's chairs whether steel tubular, solid wood or laminated wood frame, stacking cantilever, beam or education boardroom and even bariatric. Our range of coffee tables will start the soft seating section including tubs, settees, pouffes, modular seats and culminating with our new Acoustica range of booth seating. All frames for the soft seating (except some of the tubs) are made by us in our wood mill which enables us to offer you the ability to tweak and redesign our standard offering to suit your space planning better.

VENTURA

VENTURA

The V6, V14, V15 series of tubular frame chairs uses the same reliable frame which helps to reduce tipping and can be finished in black, silver, white* or chrome.

Dimensions

Seat Height: SH480mm / 450mm (without upholstery)
Overall Width: W510mm / 590mm (with arms)
Overall Depth: D555mm
Overall Height: H815

Styles & Options

The series enables you to pick from one of 2 upholstery back styles - one square (VU15) and one round (V6) - a polypropylene back (V14) and a mesh back (VM15). The V14 chair can be supplied with an upholstered pad for the seat, the back or both.

Other options include PU (Polyurethane; soft plastic) and PP (Polypropylene; hard plastic) arms, writing tablets, linkings, document baskets and trolleys for when you need to stack away and move numbers of chairs.

These different styles and configurations complement each other and enable you to mix and match standard upholstery with rigid plastic or mesh

Beam assembly

The functionality and adaptability don't stop there. For each style you can configure a beam assembly.

V6

VUS14

VU14

VU15

VM15

With or without tables...

TAB

The beam can be specified to cater for 2, 3, 4 or 5 seats or combinations of seats and tables. For sizes and further options see page 6.

Foot

There are 4 choices of foot, 1 to fix to the floor and 3 others for aesthetics.

FF

T

M

N

The frames are available in the following colours:

*White available on minimum order quantity.

Stacking

And the choices don't end there. The frame has a mobile (castor) version, a cantilever which can be supplied without arms or can take either the PP or PU arms shown and there is a cantilever version which is an all in one stacking cantilever integral armchair.

Beam space planning

To price the beams you look at the chair top first. Using the example shown a VU15 with chrome finish, VU15X, in column 1 is £234.27 There are 4 of them therefore the chair tops cost £937.08.

Next you add the cost of the beam @ £43.06 (standard issue is black). Then look at the legs and arms (if required) for the finishing of the beam assembly. If the legs are black there's no charge. If using chrome as shown you need to add £41.40.

Therefore, the final price for the VU15X4STRX is £1021.54. Our equation for an N seater beam is (N x (equivalent single chair with added features (arms/finish if not black etc)) + £43.06 (beam) + Legs finish (£0 if black) + Arms (if applicable). Its footprint is 2080mm wide by 570mm deep.

V6

This range uses its own trouble-free, anti-tilt back stacking frame and can fit into almost all visitor requirements.

MODULAR

Our three main styles of modular seating provide a standard footprint of 600mm wide by 650mm deep. We make all our frames in house and can accommodate different sizes to suit your space requirements.

The RI has an all in one upholstery jacket, the FI series accommodates a replaceable seat if need be and the AR3 brings together a box seat with a shaped back for even more flexibility.

We offer three standard arms but we can accommodate your own designs if space or aesthetics requires it.

The images are purely to stimulate ideas and are not fixed offerings that cannot be modified, manipulated or redesigned to suit the space in question.

ACOUSTICA

Acoustica builds on the flexibility of the AR3 series by enabling you to build a large number of reception permutations from 5 unique pieces of upholstery.

The seat base unit (POU17) can be assembled with 2 back designs (H and T shown) and 2 arms which can perform either as an armrest or the side wall of a noise reducing booth.

Again, we have laid out a number of standard arrangements to stimulate ideas for the space you are planning to fill; this is not a static offering but one which can be modified, manipulated and redesigned to suit your needs.

SitStand Solutions

An electric height adjustable **SitStand** desk delivers the user (whether home or office based) the benefits of both sitting and standing while they work. This shouldn't be news to anyone; in some European countries they barely offer static height desks in offices anymore, it's all about **SitStanding**.

Using a **SitStand** desk promotes good blood circulation, prevents problems associated with prolonged sitting and helps increase alertness and activity levels. It combats fatigue, raises productivity, improves mood and can help control weight! What more do you need?

Ergonomically, having bought one of our correctly specified, adjustable and supportive chairs your next step is to buy one of our electric sitstand desks to give you even more reasons to look forward to going to work!

Easy to use mechanism, ideally placed so the desk can be adjusted to the required height. Other mechanisms are available on request.

We now offer two operating systems: a single and a double motor version.

The **single motor** variety allows a width adjustment of 1000-1800mm and a height range of 690mm to 1190mm (to the underside of the top).

The **double motor** version allows for width adjustment of 1200-2000mm and height range of 615-1275mm (to the underside of the top).

There is a collision sensor available for the double motor frame but not for the single motor version.

We have a telescopic cable tray that works with both: for the single motor desk the cable tray fixes directly to the underside of the desktop; for the double motor version the cable tray fixes to the frame on designated fixing points

The single motor frame weight capacity is 80kgs and the weight capacity for the double motor frame is 100kgs. The frame can be supplied to you in a box for your self-assembly or it can be sub assembled by us for your ease of installation.

We know people often reuse their existing desktop and we are more than happy to supply our frames without tops to suit

If you have a situation where the end user doesn't want to buy a new electric **SitStand** desk but would like to offer the functionality, we can supply our desk mounted **SitStand** units as a happy halfway house solution.

The desk mounted **SitStand** unit can be supplied without a monitor arm to allow for laptop/remote keyboard set up or can be supplied with a single or double monitor arm for connection to your hard drive.

Home

We have a **home version** available in white with a footprint of 800x600mm. Height range is 685-1185 and weight limit is 80kgs. This has become especially popular with the advent of hybrid working and where the space available for a desk is very small but critical to the well being of the user.

Virtual Assessments

If you need a pre purchase **virtual workstation assessment** or any advice on homeworking, please arrange a call with one of our qualified assessors. We can help post purchase with set-up and installation advice too.

Our desk mounted **SitStand** unit can vary the desk height by 423mm which means if you allow for an average desk height of 700mm, our **SitStand** unit will give you a variance of 710-1133mm.

The overall width is 600mm and the depth varies from 840mm to 570mm in its fully upright mode, so it doesn't take up the whole desk like some of the other variable height desk modules do. Our desk mounted **SitStand** unit is available in white and can be placed on any solid surface to turn almost any area into a 'SitStand-able' work area. This is especially useful if you work from home or in a tight space. Standard leadtime is a week.

SitStand desks and accessories pricing

Tops

We have a stock line of 4 desk top colours (white, maple, light oak and beech) and in 4 sizes (1200x800, 1400x800, 1600x800, 1800x800 and all tops are 25mm thick). We can offer other colours and sizes and with the addition of port holes on a 3-week leadtime.

Prices start from £151.69.

Please call the sales office for pricing.

dealer information

Albion Chairs has been supplying its quality, long lasting, heavy duty operator seating through its comprehensive UK dealer wide network since 1987.

If you need to find your nearest dealer, please call the office on **01494 464656**, or email us at **sales@albionchairs.com**.

Virtual Assessments

If you need a pre purchase **virtual workstation assessment** or any advice on home working, please arrange a call with one of our qualified assessors. We can help post purchase with set-up and installation advice too.

delivery charges

All order acknowledgements show the Monday of the week commencing date and we assess on the Monday whether we will make the delivery as a single chair in a box, as multiple chairs in a pallet or if there is enough volume to justify us delivering in person.

If we deliver to your premises, you will receive your delivery free as normal but there may need to be assembly. If we deliver in person the chair will be fully assembled. If we deliver in a box or on a pallet, the spindle and base will need to be assembled. (See page 51 for assembly details). If we deliver on your behalf to your end user it will be charged at £25/chair for a business address and £40/chair if to end user home address; the end user will have to assemble the spindle/base. If you are unsure please call the sales office to confirm your price. (See page 51 for assembly details)

quality and warranties

No. OF USERS	No. OF HOURS PER DAY	ANNUAL HOURS	WARRANTY PERIOD 10,000 HOURS
SINGLE	8	2,000	5 YEARS
2+	24	6,240	1.5 YEARS

All Albion swivel chairs are FIRA tested to severe contract use. Our warranty period is 10,000 hours. You will see from the grid how this translates into years.

For single occupancy - up to 120kg (19 stone) - using the chair for 8 hours a day, 52 weeks a year, the warranty will be for 5 years. If the chair is to be used in a 24-hour environment by up to 3 users, the warranty period falls to 1.5 years.

The Uni range models (UNI57, 67, 77, 87) use a heavier duty mechanism which allows for the same warranty period for weight in excess of 120 kg - up to 150kgs (23 stone) and also for multi user 24/7 applications, ie 5 and 1.5 years respectively. If you need to consider weight up to 190kg (30 stones) we can offer the Grande range with the same warranty period based on the same parameters.

fabric selector

Column	Camira
1	Citadel, Era, Gravity, Phoenix, Rivet, Target
2	Advantage, Aspect, Chateau, Main Line Plus, Manhattan, Manila, Quest, Replay, Sprint, Urban, Vita, X2, Xtreme
3	Main Line Flax, Nexus
4	Halcyon (Aspen, Cedar and Blossom), Hemp, Hi Tech(anti static), Kyoto, Mainline Twist, Oceanic, Sumi, Synergy

6	Craggan Flax, Deca, Yoredale,
7	
8	Synergy Quilt 170 (channel, chevron and hourglass), Vintage

In your capacity as dealers, we know you may not always be able to ascertain how a chair may be used exactly and by whom. It is best to try to ensure any proposal you make can genuinely meet the requirements of 'fit for purpose'. If in doubt, you can come to us and cover yourself with our OW option. The OverWork option (OW) shown in the Uni bespoke pages is an extended warranty insurance and can be specified to provide an extra year of cover for any of these chairs or where it maybe unclear how a chair will be used, namely working hours in excess of 10 hours up to 24/7, more than one person using the same chair, or users where the weight is not known but in excess of 150kg. If in doubt, please call us for advice.

If you do need to report a problem with a chair, it is better to provide photographs of the chair or parts in query and will make their resolution a lot more effective. We have been identifying our chairs with a warranty label since 1994. You will find this on the underside of our chair - usually on the mechanism. No warranty claims will be considered without this information. **NO LABEL NO WARRANTY.**

Fabric selector

Our main provider of fabrics is Camira Fabrics. Camira offer two faux leather alternatives (Vita and Manila) as well as a comprehensive selection of bull hides from their Vintage range. We can also provide options from Panaz or Chieftain for vinyls, PVC's and faux leathers as well as Yarwood, Bridge of Weir et al for leathers. Prices may vary depending on suppliers and metrages so please check with the sales office for any non Camira fabric requests.

Hospital friendly

If you need hospital friendly coverings the main choices are Camira's Vita, Manila, Halcyon and Intervene.

Sales@albionchairs.com, info@albionchairs.com or orders@albionchairs.com

Please ensure all orders are emailed to one of these generic email addresses because we all receive these emails. Personal emails only go to the addressee.

DISCLAIMER

We have developed different cutting patterns for our designs depending on the type of fabric; leather and vinyls need to be treated differently to regulation soft fabrics such as woolmix tweeds which in turn perform differently to the modern crepes. We will endeavour to cater for any differences as well as possible, but we cannot prevent the occasional ripple in some fabrics from time to time. If you would like our advice which fabrics perform better than others please feel free to ask.

assembly of boxed chairs

Remove chair from packaging. Build your chair in 3 easy steps.

STEP ONE

Connect your spindle to the chair base

STEP TWO

Connect your seat to the spindle

STEP THREE

Sit on your Albion chair!

Virtual Set-up
We can help post purchase with set-up and installation advice too.
