SPYNAMICS has become synonymous with ergonomic and orthopaedic seating in the workplace since 1999. The result of collaboration between Albion Chairs and a leading osteopath, SPYNAMICS was developed for users with chronic bad backs and has continued to grow and evolve as practitioners and dealers have contributed to our knowledge pool.

Together with our dealers, we provide an at-your-desk assessment of your working environment.

We can provide a tailor made chair by taking your seated measurements and specific support needs as well as assessing the desk layout: monitor height, keyboard and mouse accessibility, footrest and can even offer advice on the possible need for an electric sitstand desk.

Albion Chairs has been manufacturing chairs since 1987. We are based in High Wycombe and have an extensive network of reseller dealers all over England.

Our other ranges include:

- Perching and saddle stools with and without backs with different seat height configurations with and without footings as well as alternative castors and glides to suit your application
- Desk accessories including monitor arms, document holders, foot and legrests
- Soft seating: pouffes, tubs, modular and settees, tables and a wide range of visitor seating
- Our electric sitstand desks come in 1200, 1400, 1600 and 1800mm widths
